

Hygiene concept Municipal Galleries Tempelhof-Schöneberg

Haus am Kleistpark, Haus am Kleistpark I Project Room,
Gallery im Tempelhof Museum, 15.11.2021

Based on the hygiene concept of the
Senate Department for Culture and Europe from 15.11.2021.

The locations of the municipal galleries can be visited in compliance with the hygiene rules. With our hygiene concept we want to ensure a smooth visit and protect visitors and employees as best as possible from infection. All the measures listed comply with the specifications of the above-mentioned hygiene concept and the Second Sars-CoV-2 Infection Protection Measures Ordinance:

Hygiene Framework Concept for Cultural Institutions in the State of Berlin

[PDF-Document - Version: 15.11.2021, Document: Senate Department for Culture and Europe](#)

From 15.11.2021 the 2G rule applies in the exhibitions of the Haus am Kleistpark. For your visit you need a valid vaccination certificate (max. 12 months old) or a convalescent certificate (min. 28 days /max. 6 months old), which must be presented to the supervisor. Contact information is not required for predominantly flowing visitor traffic. It is only a prerequisite for visiting events in closed rooms.

Mandatory testing

Presentation of a certified negative antigen test is not required to visit the exhibitions.

Mask

Wearing a medical or FFP2 mask is mandatory throughout the duration of the visit to the house.

Distance rules

Care must always be taken to maintain a distance of at least 1.5 metres from other persons. Since it is not possible to set up separate entrances and exits at our locations, special attention must be paid to maintaining the distance and the exit before entry rule in this area. The visitor service points out the direction through the exhibitions and ensures compliance with the 2G rules.

Disinfection

Visitors can disinfect their hands when entering the exhibition buildings. Disinfectant is available at the entrance to each location. Contact surfaces that are touched by the public are regularly disinfected according to a plan.

Ventilation

At all locations, the Visitor Service ensures that sufficient and regular ventilation is provided on the basis of a plan. Rooms that are not ventilated are closed to visitors.

Maximum number of persons allowed

The maximum number of persons allowed depends on the total size of the exhibition space.

Each visitor has 5 sqm at his/her disposal, groupings are to be avoided.

In practice, this means for the sites:

Haus am Kleistpark I Large exhibition hall: 16 persons at the same time per large room, incl. supervision

Haus am Kleistpark I Project room: 6 persons at the same time per room, incl. supervision

Gallery in the Tempelhof Museum: 10 persons, incl. supervision

Protection of employees

At each location, the visitor service workplace is equipped with a spit shield. All employees are provided with FFP2 masks and two antigen tests per week.

Additional rules at individual sites

In order to be able to look at books/catalogues or touch interactive exhibition objects, the wearing of gloves is obligatory. Disposable gloves will be provided.
